

Alisa M. Kreft, MS, CIH, CSP
Rohm & Haas Company

Alisa Kreft is the Corporate Director for Industrial Hygiene at the Rohm and Haas Company. Rohm and Haas Company manufactures a variety of isothiazolone-based biocides used in many products, including metal working fluids. Alisa Kreft has more than fifteen years experience at Rohm and Haas Company as an Industrial Hygienist working at several locations in the Delaware Valley where isothiazolones are researched and formulated. She is certified by the American Board of Industrial Hygiene in Comprehensive Practice in Industrial Hygiene and a Certified Safety Professional. Her presentation today will give an overview of Industrial Hygiene Test Methods for isothiazolone-based biocides related to metal working fluids in the workplace.
