

Gary Rodak
Machining Efficiencies Inc.

Gary Rodak is the President of Machining Efficiencies Inc., located in Gregory, Michigan. Gary has studied machining problems and solutions for over 30 years. He has served in the metal cutting industry as a field engineer, technical service department manager, quality manager, product development manager, chemical commodity program manager, and a broach tool designer.

MEI provides manufacturing consulting and educational programs that focus on improving the efficiency of any machining process. MEI is known for effective customized training programs for manufacturing managers, process engineers and machinists. These programs feature systematic state of the art approaches to identifying and correcting sub-optimized manufacturing practices. He has earned a B.S. Mechanical Engineering degree from the New Jersey Institute of Technology. He is also a Certified Manufacturing Engineer through SME and a Certified Metalworking Fluid Specialist through STLE.
