

Dr. Eugene M. White
Milacron Marketing Company

Dr. Eugene M. White is the Environmental, Health and Safety Manager at Milacron, Inc. He earned a Ph.D. in Environmental Health from the *University of Cincinnati College of Medicine*, an M.S. in Environmental Science from the *U.C. College of Engineering*, and a B.S. in Biology from the *University of the District of Columbia*. Prior to joining Milacron in 2001, he worked as a research scientist at NIOSH where he investigated various aspects of bioaerosol exposures and metalworking fluid microbiology. While at NIOSH, he contributed to the writing of the document, *Criteria for a Recommended Standard: Occupational Exposure to Metalworking Fluids*. He is an author of chapters in the 2nd edition of the textbook entitled, *Metalworking Fluids*. He has published numerous peer-reviewed papers on metalworking fluids, including endotoxin sampling and analytical methods. In 2006, he traveled to the United Kingdom as an invited speaker of the *British Occupational Hygiene Society* to discuss the topic of hypersensitivity pneumonitis. Earlier this year, he returned to the UK to attend a meeting of the *UK Lubricants Association*. Dr. White is a former chairman of ILMA's Safety, Health, Environmental, and Regulatory Affairs committee. Currently, he is a technical editor for *Tribology & Lubrication Technology* magazine, and he recently contributed to the writing of the ASTM standard entitled, *Standard Test Method for Determination of Endotoxin Concentrations in Water-Miscible Metalworking*.
